

POPCORN Platform

Beginner's Guide

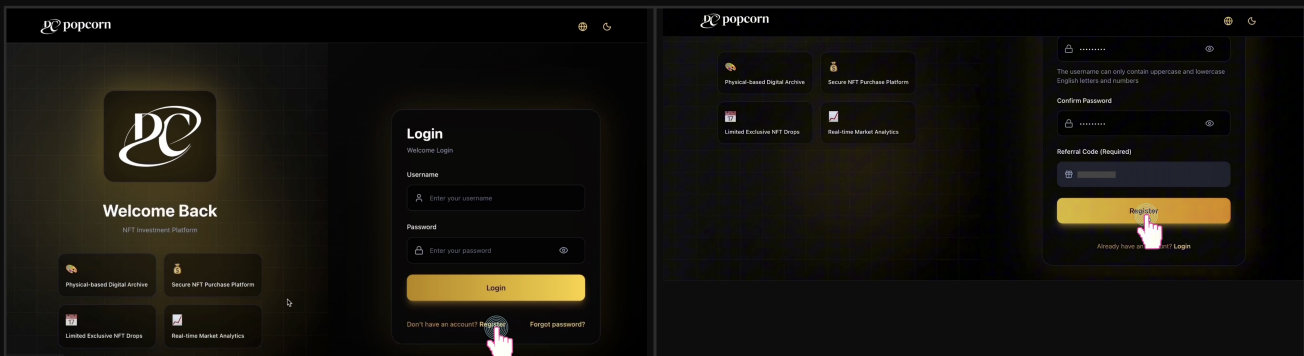

Account Registration · Security Setup · Top Up & Buy NFT · Earnings Withdrawal · Referral Rewards

This guide walks you through the complete POPCORN platform experience — from account registration to withdrawing your earnings. Designed for first-time users. Please follow each step in order.

1 Step 1 — Register an Account

Visit popcornbiz.io and access the registration page through your inviter's exclusive invitation link, or find the registration entry directly on the homepage.

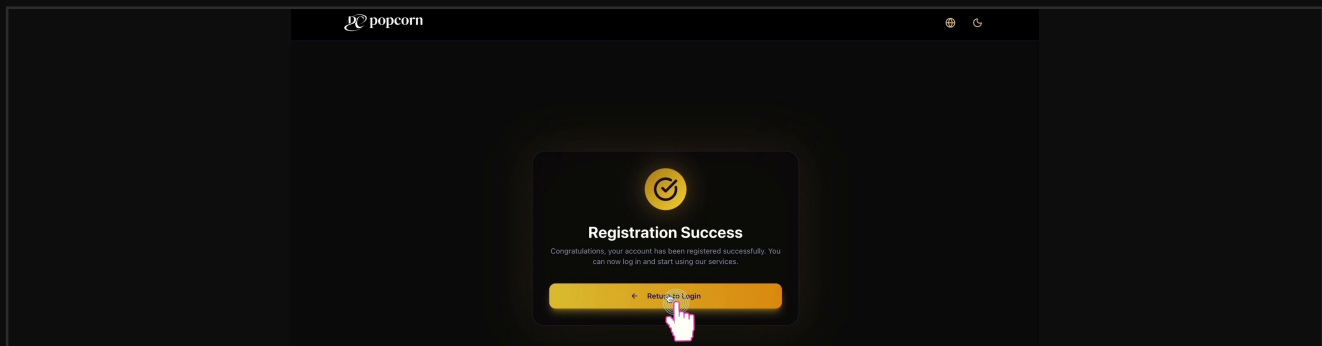

Left: Login page — click "Register" · Right: Fill in the registration form

Fill in the following fields in order:

Username	The account name used for login
Email Address	The system sends a verification code here — make sure it is correct
Email Verification	Enter the verification code sent to your email
Login Password	Must include uppercase, lowercase, numbers & special characters, min. 8 chars (e.g. POpc234\$)

Confirm Password	Re-enter your password to confirm
Invitation Code	Required. Ask your inviter. If you entered via invitation link, this is auto-filled

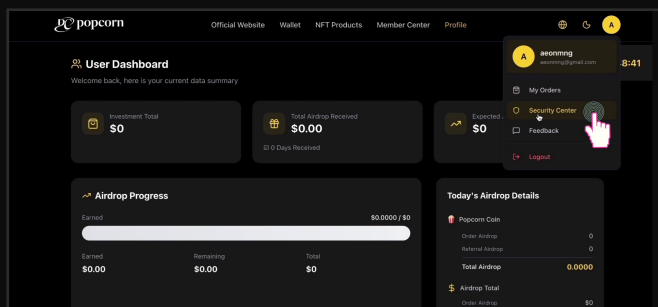

After filling in all fields, click [Register] and log in with your new account

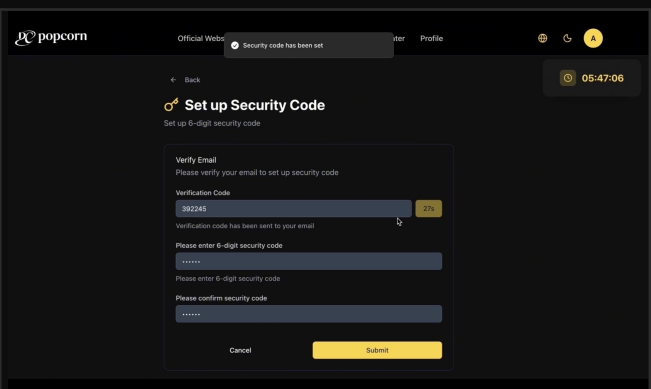

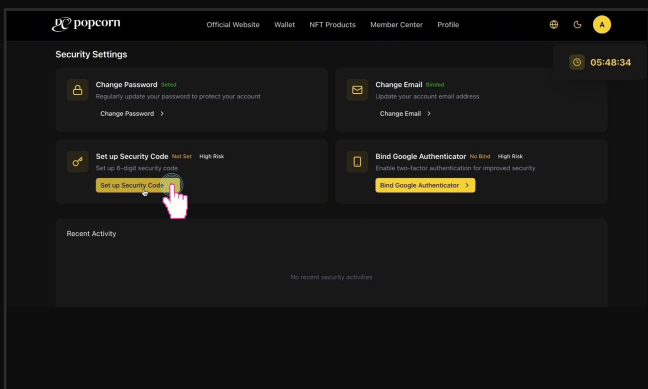

After registration, you must complete the NFT purchase within 6 hours. Accounts that miss this window are automatically deactivated and cannot be restored.

2 Step 2 — Complete Security Setup

After logging in, you must complete the security setup before making any NFT purchase. The platform will not allow purchases until this is done.

Click the avatar icon in the upper-right corner
Select Security Center from the dropdown menu

Left: Enter the Security Center · Right: Set your 6-digit security code

How to Set Your Security Code

Set a 6-digit numeric security code (this is your transaction password)

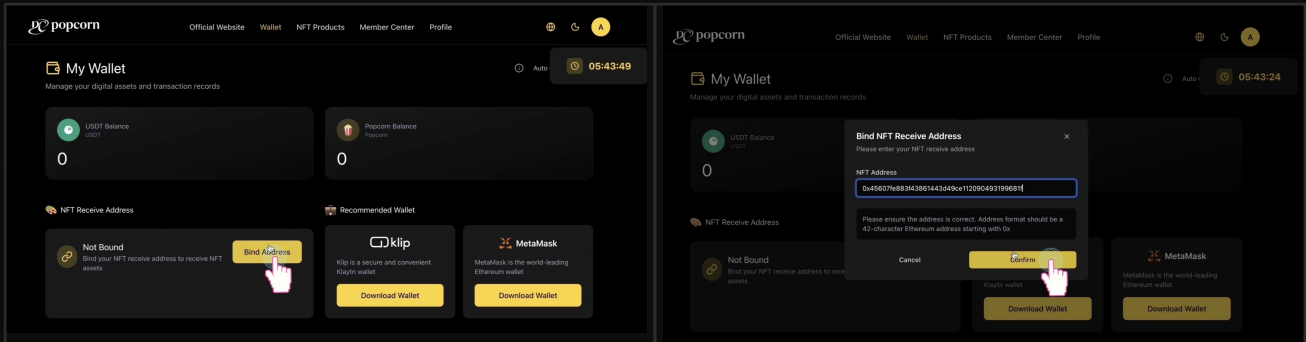

Click [Send Verification Code] — a code will be sent to your registered email

Enter the code, confirm your 6-digit security code, and complete the setup

This security code is required for all fund operations: buying NFTs, claiming airdrops, and withdrawing funds. Memorise it and keep it private.

3 Step 3 — Bind an NFT Receiving Address

Go to the Wallet page and bind your NFT receiving address (you can do this later).

Left: Wallet page — click [Bind Address] · Right: Enter your Ethereum address

Format: a 42-character Ethereum address starting with 0x

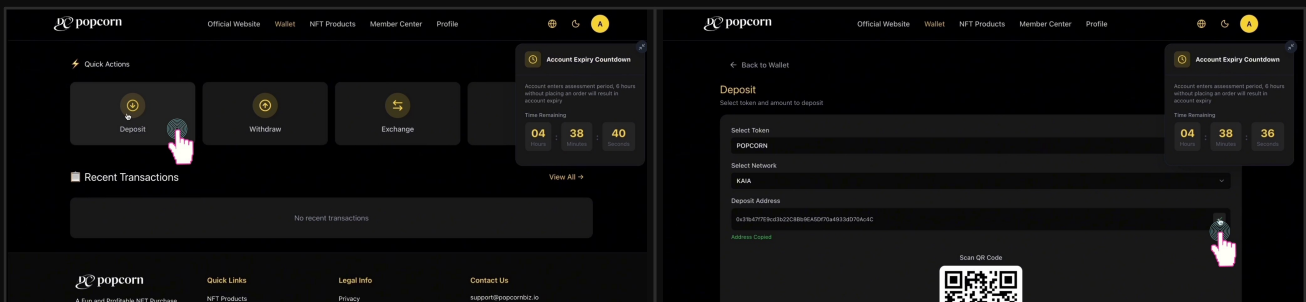

This address is used to receive the NFT you purchase

If you haven't decided yet, skip this step — it will not affect the following operations

4 Step 4 — Top Up and Purchase NFT

4.1 Get the Platform Deposit Address

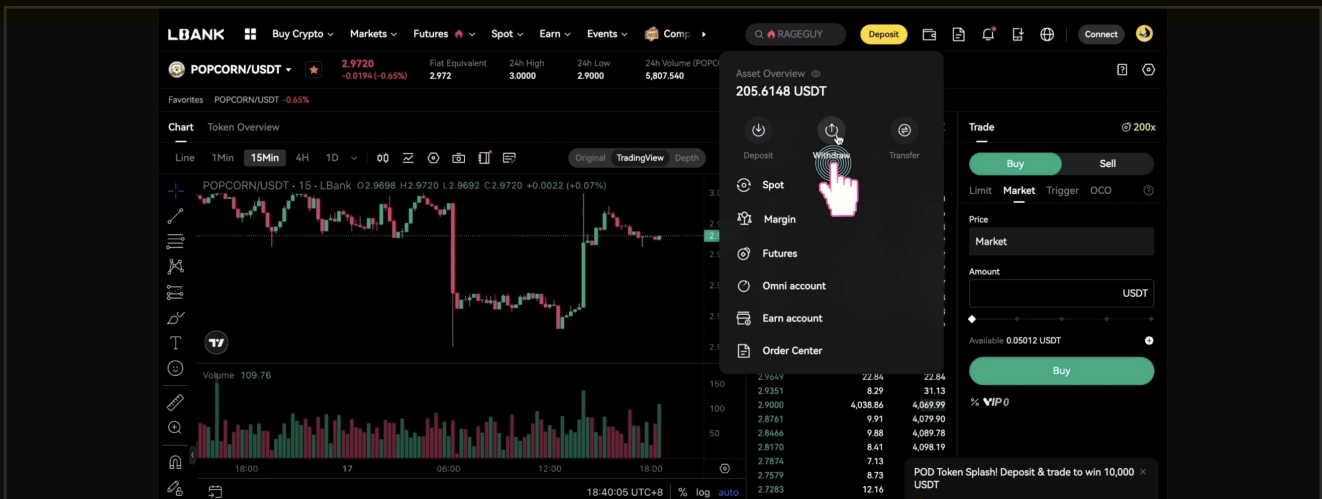

On the Wallet page, click [Deposit] and copy your dedicated platform deposit address.

Left: Click [Deposit] in your wallet · Right: Copy the platform deposit address

4.2 Buy POPCORN on LBank Exchange

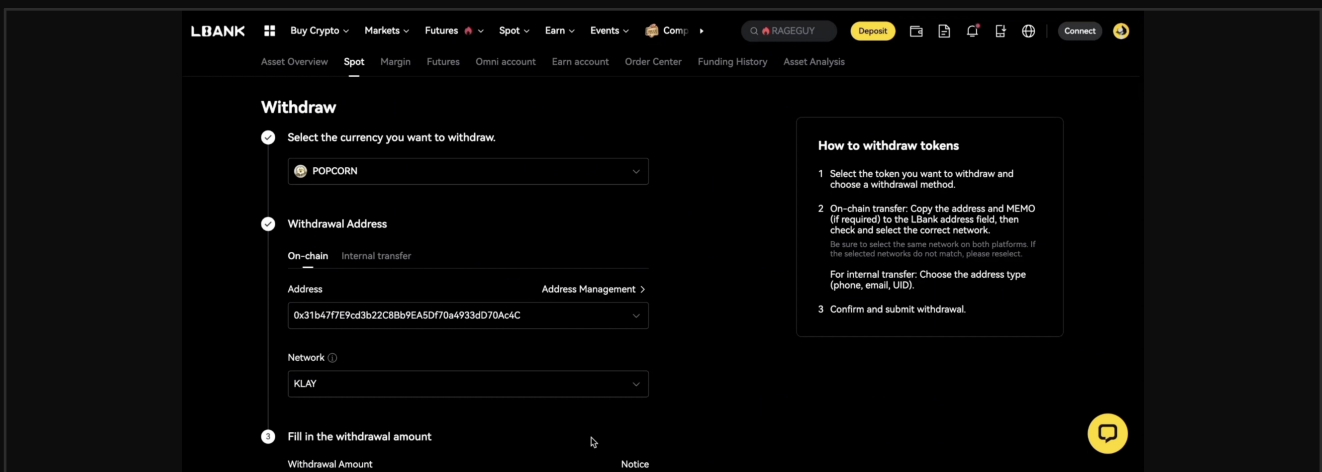

The POPCORN token is currently listed for trading only on LBank Exchange. You must buy POPCORN on LBank first, then transfer it to your platform wallet.

LBank Exchange · Search POPCORN/USDT click Withdraw to send to your platform wallet

- No LBank account? Register quickly with your Google account
- Transfer USDT from another platform into your LBank account
- Search for POPCORN on LBank and buy the amount you need

4.3 Withdraw POPCORN to Your Platform Wallet

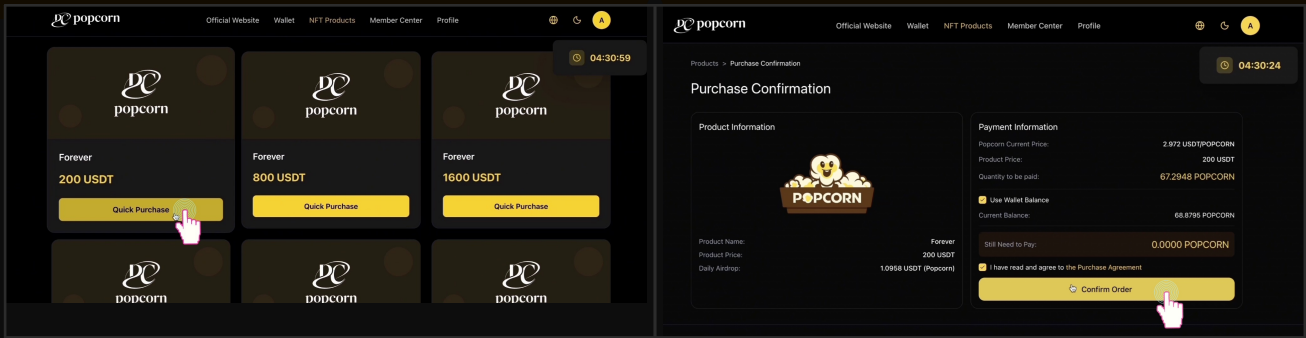

LBank Withdraw page · Select KLAY network — paste your platform deposit address

- On LBank, click [Withdraw] select POPCORN
- Paste the platform deposit address you copied in step 4.1
- Select KLAY as the network — choosing the wrong network will result in permanent loss of funds!
- Enter the withdrawal amount
- Confirm all details, enter your LBank security code, and submit
- Funds usually arrive within ~5 minutes — refresh your platform wallet to confirm

Withdraw 1 extra POPCORN to cover network fees. This prevents purchase failure due to insufficient balance.

4.4 Purchase Your NFT

Left: Select NFT product & click Quick Purchase · Right: Review order & confirm payment

Click [NFT Products] on the platform

Select your purchase amount and click [Quick Purchase]

Review the order: check [Use Wallet Balance], agree to Terms, click [Confirm Order]

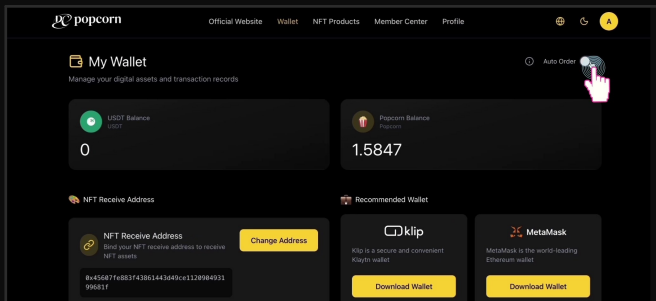

Enter your 6-digit security code in the pop-up window

Click [Verify and Pay] — purchase complete

The platform provides double airdrop rewards. A 200 USDT purchase yields 400 USDT worth of POPCORN airdrops, distributed daily over 365 days.

5 Step 5 — Auto-Renewal and Earnings Withdrawal

Enable Auto-Renewal

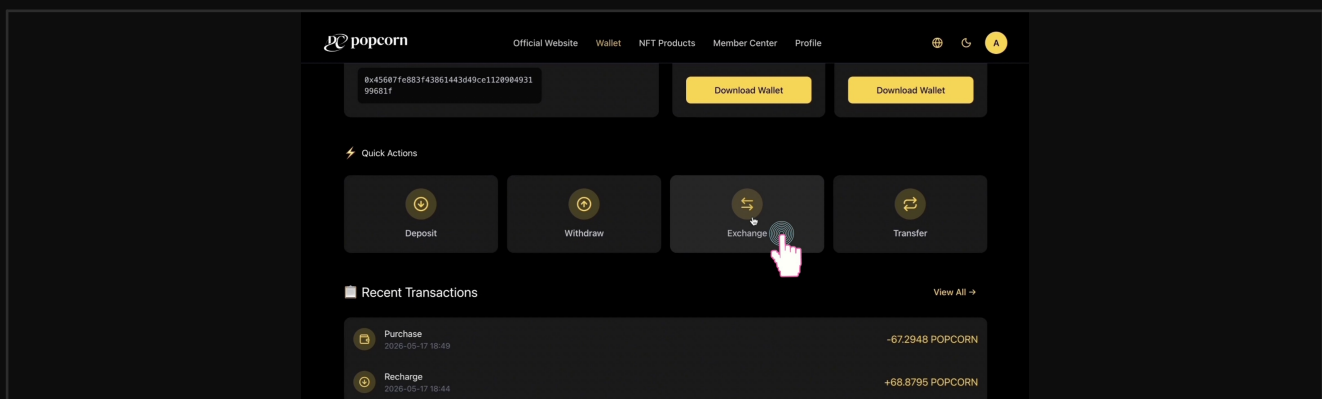

return to the Wallet page and enable Auto-Renewal.

When airdrop rewards reach 200% of your order amount

The system automatically places a new order

Ensuring you never miss a renewal cycle

Exchange Airdrop Rewards for USDT

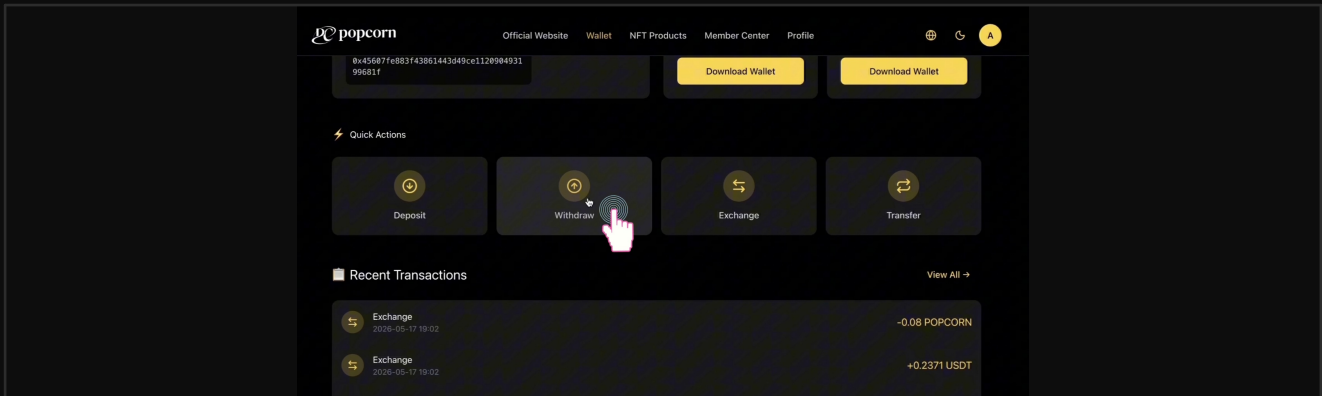

Wallet Exchange page · Convert your POPCORN airdrops to USDT anytime

Go to the [Exchange] page in your wallet

Enter the amount of POPCORN to exchange

Enter your 6-digit security code and confirm payment — done

Withdraw USDT

Wallet Withdraw page · Enter your BSC address to withdraw USDT

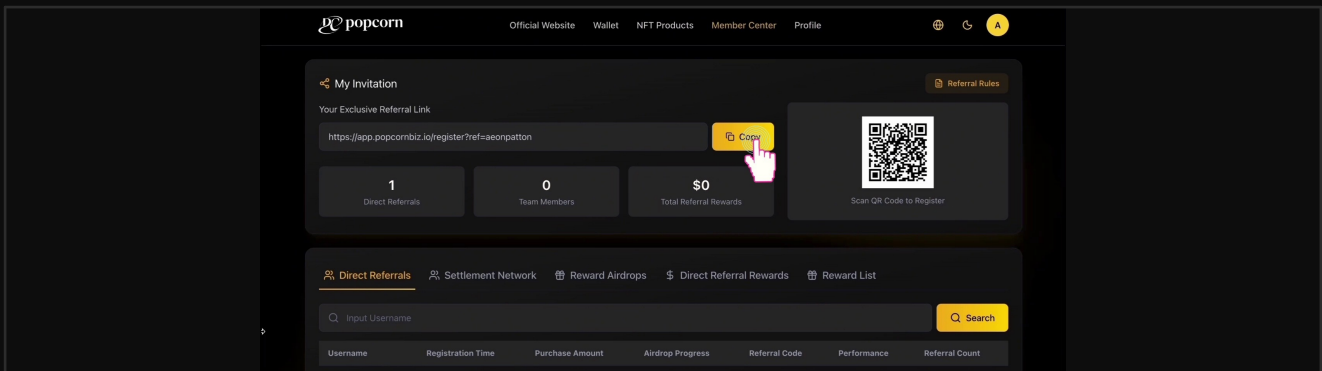

Enter the withdrawal amount

Enter your BSC (Binance Smart Chain) wallet address

Enter your 6-digit security code and submit

6 Step 6 — Invite Friends & Get Rewards

Get Your Invitation Link

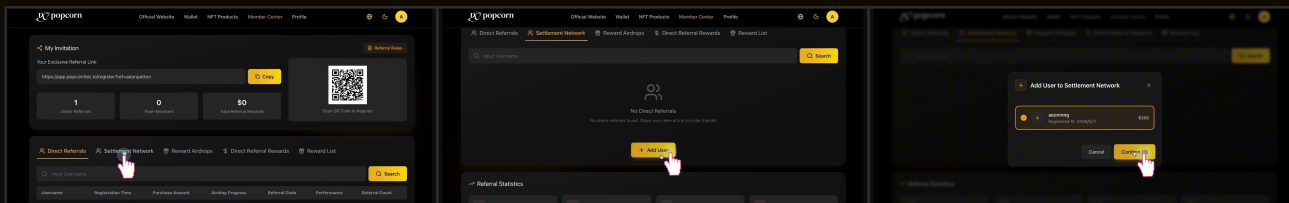

Member Center · Copy your exclusive invitation link and share it

Go to the Member Center, copy your exclusive invitation link, and send it directly to the person you want to invite.

Add the Invitee to Your Settlement Network

After the invitee completes their NFT purchase, you must manually add them to your settlement network — otherwise referral rewards will not be issued.

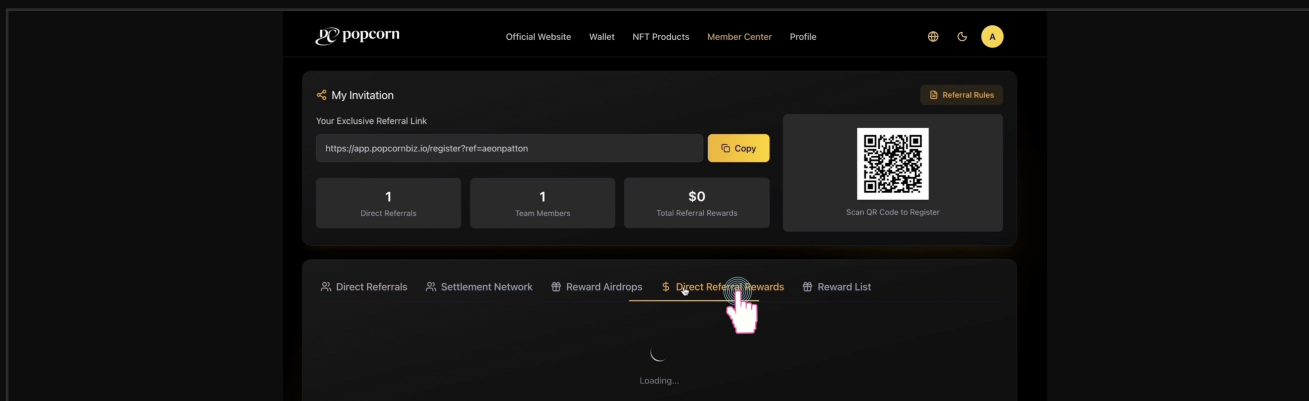

Left: Enter Settlement Network · Centre: Find the invitee's account · Right: Check and confirm

Go to [Member Center] [Settlement Network]

Find the invitee's account, check it, and confirm

View Your Referral Rewards

Member Center · View Direct Referral Rewards and latest transaction records

Go to [Member Center] [Direct Referral Rewards] to view your referral earnings. Scroll down on the Wallet page to [Latest Transaction Records] to track daily airdrop and referral reward details in real time.

Quick Reference

Item	Description
Account Validity	NFT purchase must be completed within 6 hours after registration; otherwise the account is deactivated
Password Requirements	Must include uppercase + lowercase letters, numbers, and special characters — minimum 8 characters
Deposit Network	When withdrawing from LBank, the network MUST be set to KLAY — wrong network = lost funds
Withdrawal Tip	Withdraw 1 extra POPCORN to cover network fees and avoid insufficient balance
Settlement Network	After the invitee purchases, add them manually — rewards are NOT issued automatically
Withdrawal Address	Use a BSC (Binance Smart Chain) address when withdrawing USDT
